Vuzix M400 and M4000 Smart Glasses Now Optimized for Softfoundry’s FacePro Xpert System

- **ABB deploys the combined solution to address pandemic-related support challenges**

- **Vuzix, Softfoundry and ABB to host a webinar to discuss ABB’s Remote Expert System solution and demonstrate the FacePro Xpert System featuring Vuzix Smart Glasses.**

**ROCHESTER, NY, February 26, 2021 –** Vuzix® Corporation (NASDAQ: VUZI), ("Vuzix" or, the "Company"), a leading supplier of Smart Glasses and Augmented Reality (AR) technology and products, today announced that Softfoundry International Pte Ltd (Softfoundry), a next generation green communication solution provider, has optimized its FacePro Xpert System for Vuzix M400 and M4000 Smart Glasses.

FacePro Xpert System is an AR-capable remote mentoring solution fully designed and developed by Softfoundry. Optimized for both the Vuzix M400 and M4000 Smart Glasses, the innovative application provides efficient, real-time remote global expert support, training and resources sharing via first-person perspective Full-HD to 4K video communication. As such, maintenance, inspections and repairs can be carried out without the need for the subject matter expert to be present on site. This creates great value for businesses, such as improving efficiency and productivity, while reducing the cost for travelling and deploying experts onsite. FacePro has been successfully deployed in many Fortune 500 companies, across various market verticals including automotive, rail transit, energy, petrochemical, maritime, aviation, agriculture, telemedicine and telecommunications.

One of the first customers to successfully deploy the FacePro solution with Vuzix Smart Glasses is ABB, a Swedish-Swiss multinational corporation headquartered in Zürich, Switzerland, that operates mainly in robotics, power, heavy electrical equipment, and automation technology. Since early 2020 when the global COVID-19 pandemic began, ABB has encountered challenges sending experienced technicians on-site to support their customers. To address these challenges, ABB launched ABB Remote Expert System by bundling Softfoundry’s FacePro Xpert System with Vuzix M400 smart glasses. With the new solution in place, ABB can provide timely support and response by allowing on-site technicians and experts to achieve online face-to-face communication and remote expert guidance. This enabled ABB to provide their customers with high-quality technical support anytime and anywhere, ensuring their customers’ systems are operating efficiently, while reducing operational and maintenance costs for customers, and improving safety and operational efficiency.

“We are pleased to have our FacePro Xpert System application working seamlessly with Vuzix’ smart glasses, which are amazing hardware that complements our remote expert solution,” said Joni Kuo, Co-Founder at Softfoundry.
“FacePro is a robust solution that can address numerous customer verticals and one ideally suited to provide significant productivity improvements to its users through the use of Vuzix Smart Glasses,” said Paul Travers, President and CEO of Vuzix.

The FacePro remote support application, supporting 14 different languages, is now available for download in Vuzix’ app store at https://www.vuzix.com/appstore/app/facepro-xpert-system.

Vuzix, Softfoundry and ABB will be hosting a webinar to discuss ABB’s Remote Expert System solution and demonstrate the FacePro Xpert System featuring Vuzix Smart Glasses. Interested parties that would like to learn more can register for this webinar via the link below.
