

Vuzix M300 Smart Glasses Now Provide Mac and PC Screen Mirroring Through iDisplay

ROCHESTER, NY, June 28, 2017 – [Vuzix® Corporation](#) (NASDAQ: [VUZI](#)), ("Vuzix" or, the "Company"), a leading supplier of Smart Glasses, Augmented Reality (AR) and Virtual Reality (VR) technologies and products for the consumer and enterprise markets, is pleased to announce that the Company's M300 Smart Glasses now supports iDisplay to provide screen mirroring and act as an additional display for a Mac or PC.

With the iDisplay application installed on the M300, the M300 Smart Glasses transforms itself into a screen mirror for a Mac or Windows based PC by mirroring the computer's desktop directly into the display of the smart glasses. This solution instantly transforms your M300 into a powerful out-of-box productivity tool. Users can also use their M300 Smart Glasses through iDisplay as an additional display by dragging and dropping part of your Mac or PC screen onto the M300 Smart Glasses. iDisplay works through Wifi or USB cable, and is used by individuals and organizations worldwide to enhance productivity and to organize their screen space in the best possible way.

A demonstration video of the Vuzix M300 running the iDisplay application can be viewed through the following link: <https://youtu.be/X6tsg-MoPI8>. The iDisplay application, developed by Shape GmbH, is available from the major app stores.

"With AR/MR/VR starting to take the world by storm, iDisplay's innovative software enhances productivity of people and organizations who are using touch-screen and AR/VR devices," says Ig Berezovsky, Shape's CEO. "There are countless use cases that add value across B2B, education, and B2C, and a Vuzix M300 - iDisplay combination working out-of-the-box is set to be the choice of early AR adopters".

"The iDisplay application in conjunction with the Vuzix M300 Smart Glasses provides an out-of-the-box innovative enterprise productivity tool to wirelessly connect and mirror multiple smart glasses from one PC," said Paul Travers CEO and President of Vuzix. "Display mirroring from an external computer is one of the top 10 requested applications from customers and we are now able to address this business opportunity through our relationship with iDisplay on the Vuzix M300 Smart Glasses".

About Shape GmbH
