Press Release

American Veterans with Low Vision and Blindness to Receive Smart Glasses from Vuzix Partner Cyber Timez and Wounded Warrior Program

ROCHESTER, NY, August 14, 2017 – Vuzix® Corporation (NASDAQ: VUZI), (“Vuzix” or, “the Company”), a leading supplier of Smart Glasses, Augmented Reality (AR) and Virtual Reality (VR) technologies and products for the consumer and enterprise markets, is pleased to announce that Cyber Timez, a Vuzix VIP partner has received a purchase authorization in partnership with the Wounded Warrior Program to deliver Cyber Eyez, a smart glasses based visual aid software to assist American veterans with low vision and blindness, wounded warriors and veterans. The Wounded Warrior Program, an approved Ability One vendor, is an organization with the mission to assist our nation’s wounded warriors, both men and women who have sustained permanent injury as a result of their tour in combat in their recovery efforts, which often includes employment assistance.

The project is expected to span 4 to 5 years and is targeted towards 175,000 American veterans and wounded warriors with low vision and blindness. All 42 Wounded Warrior Battalions and 40 Army Medical Centers will begin introducing Cyber Eyez on the Vuzix M300 to American veterans and their families as well offering assessment, training and technical support services.

Cyber Eyez leverages advanced AI engines to enable users with low vision and blindness to be more independent in a sighted world. Users can experience their world and get things done efficiently and independently. By using a high definition camera and an optical character recognition engine, Cyber Eyez provides highly accurate text recognition and provides the ability for virtually any text or signage read to the end-user in real time with no internet connection while still maintaining privacy. Cyber Eyez on the Vuzix M300 Smart Glasses enables many American veterans with low vision and blindness to magnify anything in their environment up to 15 times, read any text in over 100 languages, identify over 16 billion objects, recognize over a thousand colors, scan barcodes to identify products and even detect moods on faces.

"This is a tremendous opportunity for Vuzix to leverage our smart glasses and augmented reality technology to help American veterans, including our nation’s veterans and wounded warriors impacted by low vision and blindness improve their overall quality of life," said Paul Travers, President and Chief Executive Officer at Vuzix.

"We are very excited to help our nation’s greatest warriors impacted by low vision and blindness to maintain and regain their independence," commented Sean Tibbetts, Chief Executive Officer and Co-Founder of CyberTimez. "With Cyber Eyez, the Vuzix M300 is enhancing our nation’s American veterans and wounded warriors lives and enabling them to resume their daily tasks, find jobs and regain their independence."
"Our goal with this project at the Wounded Warrior Program is to outfit thousands of American veterans and wounded warriors impacted by low vision and blindness, both men and women with smart glasses to help them find jobs, improve their quality of life and give them financial independence," commented Dr. David Godbold, National Director of the Wounded Warrior Program.
