

## **Vuzix Amends Non-Compete Agreement Enabling it to Sell Products to First Responders, Security Organizations and Third-Party Defense Suppliers and to Military Organizations**

**ROCHESTER, NY, October 10, 2018** – [Vuzix® Corporation](#) (NASDAQ: [VUZI](#)), ("Vuzix" or, the "Company"), a leading supplier of Smart Glasses and Augmented Reality (AR) products and technologies, is pleased to announce that the Company has amended the 10-year non-compete restrictions it entered into with the buyer of its defense division in June 2012. The division's buyer, TDG Acquisition LLC (DBA – Six15 Technologies ("Six15")) originally negotiated a ten-year non-compete whereby Vuzix agreed not to sell products or services directly or indirectly into the global Military, US Department of Defense, Security Organizations and First Responder markets. The previous non-compete agreement had just under four years remaining and with a new amendment in place will allow Vuzix to immediately pursue opportunities related to the Company's smart glasses and waveguide optics technologies into these expanded market opportunities related to first responders, US Department of Defense, Security Organizations and the Military.

"Vuzix has always seen great opportunity in the first responder, defense and homeland security markets but saw better near-term opportunities in enterprise and consumer when making earlier resource allocation determinations," commented Paul Travers, President and CEO. "Today, we have seen military, security and first responder opportunities come to the forefront as well. In assessing these developing opportunities, Vuzix and Six15 felt that collaboration rather than competition is the right mix to pursue and potentially win these significant opportunities. As such, we worked with Six15 to find ways where we might best pursue these opportunities and are quite pleased to reach this resolution afforded by the amendments to the earlier transaction documents. Together, we see many great opportunities and look forward to bringing Vuzix back to its roots and once again becoming a key player in the defense and military markets."

"Six15 is excited to expand the relationship with Vuzix and create opportunities to best support First Responder and Defense communities. Through a cooperative agreement, we believe that both companies can deliver superior solutions to these markets and focus on the strengths each organization brings to the relationship," commented Rich Ryan, CEO of Six15 Technologies.

These new markets for Vuzix products are significant in both the United States and globally; and exceed millions of equivalent personnel that could leverage and benefit from our products. The defense and security organizations include business customers and Governmental Entity customers that primarily provide security and defense services, including police, fire fighters, EMTs, other first responders, homeland and border security.

Further, pursuant to the non-compete amendment, Vuzix and Six15 have agreed to work together on incorporating Vuzix' industry leading waveguide optics and display engine technologies into Six15 products and offering Vuzix smart glasses solutions directly to Governmental Military Organizations around the world.

Additionally, Vuzix is now permitted to perform contract work with and sell its waveguide optics and display engines to the largest third-party defense suppliers around the world that wish to incorporate Vuzix near-eye display or HMD technologies into the products and systems that they sell into Military Organizations. Direct sales of products and services by Vuzix to Military Organizations are still precluded pursuant to the original non-compete.

As a part of this amendment, Vuzix will pay a total of \$1,500,000 to Six15 in three installments over the next six months and will pay commissions at various rates for any sales into these re-opened markets. For more information, please refer to the Company's 8K filed today with the SEC.

## **About Vuzix Corporation**

Vuzix is a leading supplier of Smart-Glasses and Augmented Reality (AR) technologies and products. The Company's products include personal display and wearable computing devices that offer users a portable high-quality viewing experience, provide solutions for mobility, wearable displays and augmented reality.
