

## Istanbul University Faculty of Dentistry Using Vuzix M400 Smart Glasses to Guide Clinical Remote Student Learning

- *Vuzix continues to expand international presence with new use cases for remote learning and telemedicine*

**ROCHESTER, NY, November 3, 2020** – [Vuzix® Corporation](#) (NASDAQ: [VUZI](#)), ("Vuzix" or, the "Company"), a leading supplier of Smart Glasses and Augmented Reality (AR) technology and products, today announced that Istanbul University Faculty of Dentistry, via local Vuzix distributor Eva Bilişim, are using Vuzix M400 Smart Glasses to support remote student learning.

Due to the COVID-19 pandemic, clinical practice courses at the University must be held in accordance with pandemic conditions in the clinics under the Istanbul University Medical Society. The dentistry faculty determined that the dentistry educational model is one where theoretical and clinical knowledge requires support by intensive clinical experiences. With face-to-face training difficult due to the pandemic process, the Istanbul University Faculty of Dentistry began using Vuzix M400 Smart Glasses to broadcast live applied courses and clinical applications to enhance the educational quality of its online learning effort.

“More and more healthcare practitioners and educators around the world are recognizing the value of using Vuzix Smart Glasses to provide remote support, live broadcasts of procedures and other vital telemedicine services to their patients, associates or students,” said Paul Travers, President and CEO of Vuzix. “There is high value in working together with students and teachers to adopt our technology as these students will become our doctors and dentists in the future. We are pleased to add the Istanbul University Faculty of Dentistry to the growing list of schools in the medical space that are embracing our technology to provide safer and more effective clinical educational experiences.”
