

Plug Power Develops Vuzix Smart Glasses-Based Remote Training and Onboarding Program to Support its Hydrogen Fuel Cells

ROCHESTER, NY, December 15, 2020 – [Vuzix® Corporation](#) (NASDAQ: [VUZI](#)), ("Vuzix" or, the "Company"), a leading supplier of Smart Glasses and Augmented Reality (AR) technology and products, today announced that Plug Power (NASDAQ: [PLUG](#)), a leading provider of hydrogen engines and fueling solutions for enabling e-mobility, has developed and successfully deployed an AR smart glasses-based remote training and onboarding program utilizing Vuzix M400 Smart Glasses powered by Ubimax Frontline, a fully integrated productivity solution platform.

The arrival of COVID-19 presented new challenges for Plug Power operations to train and support their field technicians and their growing customer footprint. In a matter of weeks, Plug Power was able to adapt their in-person training and onboarding programs into AR virtual smart glasses-based training programs. The AR support program provides Plug Power technicians with a kit consisting of Vuzix Smart Glasses preloaded with Ubimax Frontline software, which not only enabled technicians to capture and review on-the-job processes hands-free with a trainer remotely, but also replaced the need for more expensive in-person training events and gatherings.

"We turned to Vuzix and Ubimax soon after the COVID-19 pandemic arrived to help solve operational challenges related to onboarding and training our technicians," commented Chris Suriano, Plug Power Vice President of Service. "We look forward to expanding the use of AR smart glasses for the long-term to support more extensive use cases."

"Plug Power is another great example of how companies are turning to Vuzix Smart Glasses to deliver cost-effective solutions and alternatives to in-person gatherings to deliver ongoing training and remote support for field technicians," said Paul Travers, President and Chief Executive Officer at Vuzix.

About Plug Power

Plug Power is building the hydrogen economy as the leading provider of comprehensive hydrogen fuel cell (HFC) turnkey solutions. The company's innovative technology powers electric motors with hydrogen fuel cells amid an ongoing paradigm shift in the power, energy, and transportation industries to address climate change and energy security, while providing efficiency gains and meeting sustainability goals. Plug Power created the first commercially viable market for hydrogen fuel cell (HFC) technology. As a result, the company has deployed over 35,000 fuel cell systems for e-mobility, more than anyone else in the world, and has become the largest buyer of liquid hydrogen, having built and operated a hydrogen highway across North America. Plug Power delivers a significant value proposition to end-customers, including meaningful environmental benefits, efficiency gains, fast fueling, and lower operational costs. Plug Power's vertically-integrated GenKey solution ties together all critical elements to power, fuel, and provide service to customers such as Amazon, BMW, The Southern Company, Carrefour, and Walmart. The company is now leveraging its know-how, modular product architecture and foundational customers to rapidly expand into other key markets including zero-emission on-road vehicles, robotics, and data centers.

About Vuzix Corporation

Vuzix is a leading supplier of Smart-Glasses and Augmented Reality (AR) technologies and products for the consumer and enterprise markets. The Company's products include personal display and wearable computing devices that offer users a portable high-quality viewing experience, provide solutions for mobility, wearable displays and augmented reality. Vuzix holds 179 patents and patents pending and numerous IP licenses in the Video Eyewear field.
